

Ventilation & Cleaning Equipment

Hold Cleaning Gun

For cleaning of bulk carrier holds by a high pressure water stream. A strong stream of water can be projected a distance of over 20m to remove loose rust, flaking paint or cargo residue.

Water Driven Ventilator (Gas Freeing Fan)

Designed for high performance ventilation of gas from large enclosed areas or other tank openings, Works effectively providing penetration deep into the tank for complete ventilation, Made of a non-spark construction with a line impeller and integral water motor that are coated against corrosion.

Air Driven Ventilator (Gas Freeing Fan)

Air driven ventilators provide an efficient and cost effective system of natural ventilation. Energy Saver, these are suitable to install any type of roofing sheds. These ventilators are designed to make the most of one of the most powerful renewable and inexhaustible source of energy- the wind.

Pneumatic Mucking Winch

Air-Operated Mucking Winch Designed for the speedy removal of cargo tank scale and sludge. Mucking winch features a rotary gas motor driven by the vessel's air supply system. Engineered for durability in a maritime environment.
